Subject Case Upload Modification 

Software Venders,

We have updated our Case Upload software to look for the means flag. It ought to be the 20th data element in the debtor.txt file. If there is not a 'y' or 'n' in that field, the upload will fail. I have the updated software installed in our training database. Please test it out and verify that all is working properly with your software.

Should you have any issues, please let me know. Barring any issues, I plan to install this version in our live database during the week of November 28th.

Thanks,

Harland
